Philip Zelikow: Bush Appointed Author of 9/11 Commission Report - con't

Mr. Bugliosi, you recognize overreaching when you hear it. Mueller's melodramatic alleged identification of the hijackers by having "*talked to many of the families of the victims*" is preposterous. Within days the impossibility of the Arabic names listed by Mueller was exposed. The first absurdity was Mueller's initial identification of the alleged hijacker of American Airlines Flight 77.^v Thereafter it was reported that 11 of those identified were known to be '[alive and well](#).' When confronted, Mueller diverted to the excuse that "*the suicide hijackers may not have had tickets.*" But if the hijackers did not have tickets, then what airlines manifest was Mueller referring to at his dramatic press conference of 14 September 2001?

Mueller went on to proclaim that "*the (19) hijackers may used stolen passports.*" Of the "*stolen passports,*" let us focus on that owned by Satam al Suqami, one of the alleged suicide hijackers of Flight 11. [At the 9/11 Commission of Monday, 26 January 2004](#), Co-chairman Kean announces that the hearing will focus on "border security." Zelikow begins with his first witness, [Susan Ginsburg](#):

Zelikow: "Members of the Commission, working with you we (Zelikow's staff) have developed initial findings on how the individuals who carried out the 9/11 attacks entered the US . . . terrorists of certain nationalities must obtain a document permitting them to visit, a visa. Finally, the terrorist must actually enter the country and keep from getting detained or deported by immigration or other law enforcement officials. Susan Ginsburg, senior counsel to the Commission will begin by examining how the hijackers navigated these stages."

Ginsburg: "Beginning with passports. Four of the hijacker's passports have survived in whole or in part. Two were recovered from the crash site of United Airlines flight 93 in Pennsylvania. These are the passports of Ziad Jarrah and Saeed al Ghamdi. One belonged to a hijacker on American Airlines flight 11. This is the passport of Satam al Suqami. A passerby picked it up and gave it to a NYPD detective shortly before the World Trade Center towers collapsed . . ."

We are supposed to believe that the nearly indestructible Flight Data Recorder (FDR) did not survive the alleged crash of Flight 11, a crash that allegedly caused a "raging inferno" that melted tons of steel, and caused the collapse and utter disintegration of a 110-story skyscraper. But Zelikow/Ginsburg would have us believe that "*a passerby*" found the paper passport of Satam al Suqami after the crash but "*shortly before the World Trade Center towers collapsed.*"^w

On 9 August 2007, Zelikow was at the State University at Buffalo Chautauqua Institution in upstate New York. He was asked a simple question, regarding the identities and status of the "19 suicide hijackers" of 9/11, by Professor Paul Zarembka, author of [The Hidden History of September 11, 2001](#):

^v The enclosed film ZERO explores the identities issue extensively. However, did the hijackers get on-board and identify themselves by-name so that in-anticipation of alleged calls made by "the victims" to their families, the latter could pass along those identities to Mueller? And which families? Is Mueller talking about the Olson family, Ted and Barbara? [The same Ted that made argument before the US Supreme Court in December 2000 to ensure that Bush was appointed to the presidency? The same Ted who claimed to have received two calls from Barbara](#), who just happens to be aboard what was alleged to be American Airlines Flight 77, that is alleged to have crashed into the Pentagon at 9:38 am on 9/11, as she makes alleged calls to him while huddled in the back of the aircraft with Captain Charles Burlingame, [the same Burlingame that reportedly participated in Operation MASCAL in October 2000?](#) And which telephone technology did Barbara or any of the "family members" use? First Mueller, Olson and the media claimed that she used her cell phone. But when it was shown that such a call is impossible, [even today unless the airliner is equipped with recently released technology](#), the story was changed to her use of an airphone. But when it was pointed out that Flight 77 did not have airphones, the issue was muzzled by the news media. The 9/11 Commission also omitted the telephone fraud issue, especially as it related to Barbara Olson. In the DOJ trial against the "20th hijacker" Moussaoui, the FBI in-sworn-testimony completely refuted the Ted claim of receiving TWO calls from Barbara. [No cell phone calls or airphone calls were made from Flight 77 on 9/11.](#)

^w Footnote 76, Chapter 1, the 9/11 Commission Report states: "The CVR's and the FDR's from American 11 and United 175 were not found." Footnote 106, Chapter 7, the 9/11 Commission Report states, "the passport of Satam al Suqami was recovered." Are Zelikow, Ginsburg, Mueller, and the 9/11 Commission ostensibly proposing that skyscrapers be made out of paper?
