Mrs. Jummai Nache and devoted husband Philip; learning how to walk stairs on prosthetic limbs. Amputation of her limbs caused by modRNA injection mandated by her former employer, the University of Minnesota (UMinn).

A non-smoker, a non-drinker, a *"model of health"* prior to Pfizer needle; amputations in pictorial review caused by modRNA-induced venous and arterial thromboembolism. Such was not merely foreseeable but a known *"mRNA"* danger, discussed in-detail at the secret FDA meeting of 22 October 2020. That meeting occurred prior to their Emergency Use Authorization (EUA) of 11 December 2020, where the dangers were ignored. **The EUA allowed Pfizer, hospital administrators, university officials, medical doctors, clinicians, nurses, et al. to inject the modRNA poison under the secretive protections of LIABILITY IMMUNITY.**

**Subject : Mrs. Jummai Nache and her Family**
