As detailed on Page 16, Mr. Bourla was repeatedly “*unavailable*” to testify at the European Union Parliament. However, he does make himself readily and repeatedly available for any gala that fulfills his “contribution” to the COVID-19 Crime Syndicate. One “contribution” is his adolescent routine of accusing others of the very crimes that **he** is guilty of !

Suddenly and unexpectedly: 8-year-old “vaccination poster child” dies after a heart attack

October 13, 2023 2.2 minutes reading time

by Dr. Peter F Mayer

An 8-year-old boy who featured in a nationwide campaign promoting Covid vaccines for children has tragically died of a sudden heart attack. Yonatan Moshe Erlichman of Israel died unexpectedly of cardiac arrest while taking a bath.

The boy reportedly slipped under the water after his heart suddenly stopped beating, causing him to drown. He was admitted to Hadassah Hospital on Mount Scopus in serious condition but died a few days later, on September 28, after being kept alive on life support.

Cornell University administrator Ms. Martha Pollack was an origin member of the New York Forward ReOpening Advisory Board; as was close friend Mr. Albert Bourla. This “New Normal” coercion group was chaired by ex-Governor Andrew Cuomo (see last page of this Exhibit 2).

This clown show was a marketing arm of Pfizer. **In every way similar to Israel**, Its purpose was to use “New Normal” coercions as a means to mandate the Pfizer modRNA needles upon the “guinea pigs” of New York State (see last page of this Exhibit 2).

- GOVERNOR ANDREW M. CUOMO, 4/2/2020

In mid-August 2021, with Cornell using the coercions of student expulsion, and faculty/staff employment dismissal as an open threat, the NY Forward Advisory Board issues a bold-faced lie:

The FDA did not remove the original Pfizer modRNA from LIABILITY IMMUNITY, via canceling of Emergency Use Authorization. The “Full Approval” announcement of the FDA and the NY Forward Advisory Board was a coordinated deception.

The screenshot shows a website page with a yellow header. The top left corner displays the date and time: "August 23, 2021 | 2:20 pm" and the page title "COVID-19 Vaccines". The top right corner contains a news snippet: "On August 23, the FDA announced the full approval of the Pfizer-BioNTech vaccine for the prevention of COVID-19 disease in individuals age 16 and older. Read more." Below the header is a navigation bar with a "NEW YORK STATE" logo on the left and menu items: "Services", "News", "Government", and "COVID-19 Vaccine". A dark blue footer bar contains the text "New York Forward" on the left and "Industry Guidelines", "Testing", "Vaccine Program", "Advisory Boards", and "Protect Yourself" on the right. At the bottom, a large orange banner reads "NY Forward Advisory Board".

Despite repeated direct notification on this coordinated “full approval” deception, Cornell administrator Ms. Martha Pollack has ignored the undersigned.

Despite 95% vaccination rate, Cornell today has five times more COVID cases than it did this time last year

ANALYSIS: *If the goal is to prevent infection, the 95 percent vaccination rate on Cornell's campus has not accomplished that*

Cornell University has aggressively pushed its students to get vaccinated, **announcing** a vaccine mandate for the 2021-22 academic year in April and frequently denying religious and medical exemptions.

As a result, 95 percent of the campus population, both students and faculty, is vaccinated.

The Cuomo / Bourla / Pollack “guinea pigs” letter, directed at New York and Cornell University :

STATE OF NEW YORK

January 18, 2021

Albert Bourla, DVM, Ph.D.
Chairman and Chief Executive Officer, Pfizer
235 East 42nd Street
New York, NY 10017

Dear Dr. Bourla:

On behalf of all New Yorkers, I want to thank you and the teams at Pfizer and BioNTech for your hard work to develop a safe, effective vaccine for COVID-19. The last ten months have been exceptionally dark – but your efforts have provided a bright light at the end of the tunnel and hope for a better future. It is abundantly clear that these vaccines are the weapons that will finally win the war against COVID-19. But with hospitalizations and deaths increasing across the country this winter, we are in a footrace with the virus, and we will lose unless we dramatically increase the number of doses getting to New Yorkers. After myself and seven other governors called on the Trump Administration to release more doses, HHS Secretary Alex Azar said that relief was on the way. To date, however, the federal government has not acted on that promise – in fact, New York will receive just 250,000 doses this week, 50,000 fewer than the week prior.

Because you are not bound by commitments that Moderna made as part of Operation Warp Speed, I am requesting that the State of New York be permitted to directly purchase doses from you. The distribution of any doses obtained directly from Pfizer will follow the rigorous guidance the State has established, while enabling us to fill the dosage gap created this week by the outgoing federal administration. All of this will further our goal to vaccinate 70 to 90 percent of New Yorkers as soon as possible and reach herd immunity.

You no doubt understand the challenges New York and other states face. Shifting guidance from the Centers for Disease Control and Prevention drove the number of New Yorkers eligible and prioritized for the vaccine from 5 million to 7 million practically overnight. The federal administration essentially opened up a floodgate while cutting our supply – leading to confusion, frustration, and dashed hopes.

Pfizer is a New York company – something I am greatly proud of. The company’s decision to opt out of Operation Warp Speed, which the Biden administration plans to overhaul, puts it in a unique situation that could help us save lives right here in New York. I am happy to discuss this matter further with you.

Sincerely,
